Challenge 02 - Git-101

Photo by [Valentin Antonucci](#)

Objectives

Become fluent with Git and GitHub

Guidelines

1. Go to `~/code/YOUR_GITHUB_USERNAME` . Check your position with `pwd` . Create a new directory called `git-101` .
2. Initiate a git repository in `git 101` and push your repo to your GitHub account. Do not forget to create a remote.
3. Add a `hello_world` file to your `git-101` directory. Write "Hello World! in it using command line only.
4. Save your changes and update your GitHub repository. Check manually on GitHub.
5. Delete your local folder `git-101` using command line only. Verify that it is still present on GitHub. Clone it again.
6. Check the history of the cloned `git-101` folder.

7. Delete your repository `git-101` on GitHub. Delete your local folder `git-101` .
